IT professionals have  
known & used for years!

# The multi-purpose go-anywhere versatile HACK button!

Never get bogged down in troubleshooting nightmares again!  
Gain access to encrypted information or secured ventilation shafts!

It's so easy to use:

1. Place HACK button on or near  
 device you wish to hack.
2. Press HACK button.

***It's just that simple!***

Please use HACK button responsibly. Do not attempt to press HACK button  
if your button-pressing finger is sprained or broken.
